

San Joaquin County Respiratory Illness (Influenza) Report

September 30, 2018 (Week 40) — May 4, 2019 (Week 18)

OVERVIEW

🦑 Flu activity is rapidly decreasing with minimal positive results (Figures 1 & 2); this is similar to statewide and national trends.

🥠 Thirteen confirmed deaths (all ages) this flu season compared to thirty-one during the same time period last flu season (Table 1).

🥠 In Week 18, the majority of influenza positive specimens were A/H3N2 instead of A/H1N1, a pattern that started in week 9 (Figure 2).

Indicators			Current Season (Week 40-Week 18)		Previous Season (Week 40-Week 18)
Deaths due to influenza (total) *				13	31
<18 years ¹			1		1
18-64 years			8		7
65+ years			4		23
Respiratory outbreaks			2		13
	n Title 17 reporting: influenza deaths (ages and and will be updated in future reports; ¹ p		f this season; *All de	eaths are obtained from death certi	ficates by date of death; therefore a significan

health laboratories often receive samples that have already tested positive for influenza at a clinical laboratory and therefore percent positive would not be a valid indicator of influenza activity. **Sources:** Table 1. Outbreaks accessed through local CalREDIE system and deaths obtained from the California Department of Public Health (CDPH) Influenza Surveillance program, 5/8/2019. Figure 1. Influenza positive tests were obtained from the CDPH Influenza Surveillance program, 5/8/2019. Figure 2. Influenza type and subtype data received from San Joaquin County Public Health Laboratory (SJCPHL), 5/6/2019.
